

Customize Your Article with Sections & Styles

Using Sections & Styles, you can create a different look and feel for each section of your article.

SECTION STYLE OPTIONS

- Layout Width
- Background Image
- Background Color
- Background Overlay

SECTION STYLE OPTION

BACKGROUND COLOR & IMAGE

The background color is set to the primary color, and an image background with transparent areas was selected, which allowed the primary color to peek through.

CONTENT BLOCK

IMAGE

The Content Block for an Image was added, set to small, and aligned to the left to create a drop cap effect.

CONTENT BLOCK

TEXT

The Content Block for Text was added and article text was copied and pasted into the editor. Then, using the style option, the text color was set to neutral (white).
